

vets' all natural

by Dr Bruce Syme

Skin Allergy Protocol

Dr Syme's 6 week protocol for treating allergic skin disease will give you up to 60-70% success in getting dogs and cats stable and itch free, without the ongoing use of cortisone, antihistamines, antibiotics and medicated shampoos.

Part 1 Premium Choice Allerblend Variety – exclusively for 6 weeks.
No other treats, snacks or foods at all for this period.

Part 2 Vets All Natural Omega Blend Oil sid

Part 3 Protexin Powder (Int. Animal Health) at 5g per 20kg sid

Part 4 High Potency Antioxidant supplement (eg "Oxygenics" by Metagenics Co.)
– sid to tid relative to level of pruritis.

- Do not wash or shampoo the dog or cat during the 6 weeks. If the owner insists on feeding treats, use only Vets All Natural Medi-Treats Skin Support.
- Use topical cortisone or Vets All Natural Dermal Ointment sparingly to treat any active skin lesions during this time.
- After 6 weeks, begin to cease the supplements one at a time, at least 7 days apart. If any signs reappear, continue the supplement for a further month.
- If feeding raw bones, stick to kangaroo tails during the trial to avoid introducing an additional meat protein.
- Stubborn cases may take up to 3 months to fully recover.
- Maintain a strict raw food diet like Premium Choice or Complete Mix for the life of the animal.
